## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 15-33, 35 and 36, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 452.
  - II. Claim 34, drawn to a semiconductor device, classified in class 257, subclass 506.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as forming an oxidation-prevention film on an unoxidized surface of a silicon substrate; implanting oxygen atoms at an energy such that the implanted oxygen atoms are localized at the covered surface of said silicon substrate; and heat-treating said silicon substrate, thus forming an oxidized surface of said silicon substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2823

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
